(54) Title: METHOD AND SYSTEM FOR ALLOCATING SHARED RESOURCES BETWEEN APPLICATIONS

(57) Abstract: On resource limited platforms a set of scalable and non-scalable algorithms may run to enable different applications concurrently, while using all available programmable resources. One of the applications may have the main user attention (user focus), but there is no mechanism to automatically or manually adapt the output quality to the application with user focus. The present invention provides a solution by means of a method and a corresponding system for allocating shared resources between applications with media information on a resource limited platform. The method comprises the steps of identifying an application with a current focus of a user; setting or increasing the output quality of the application with the current focus of the user; and automatically allocating a remaining part of the resources to at least one application without the current focus of the user.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
